1.Análisis inicial de políticas CIS

Este es el CIS Benchmark de un agente Ubuntu conectado a Wazuh:

Inicialmente aparecen 118 políticas falladas:

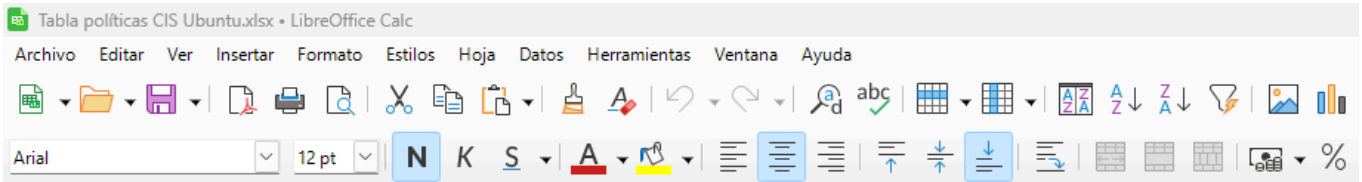

No todas deben corregirse. Algunas pueden ser peligrosas, innecesarias o incompatibles con nuestro entorno. En esta situación prevalece nuestro criterio propio.

Para revisarlas mejor usamos LibreOffice Calc:

```
sudo apt update
sudo apt install -y libreoffice-calc
```

En el archivo "Tabla políticas CIS Ubuntu" revisamos las 118 políticas y marcamos cuáles vamos a aplicar:
